UTILIZING OUR STRENGTHS, AIMING AT FURTHER GROWTH

DAIDO STEEL CO., LTD.
UTILIZING OUR STRENGTHS, AIMING AT FURTHER GROWTH
ANNUAL REPORT 2017

THE COMPANY

DAIDO STEEL CO., LTD. ranks among the world's largest manufacturers of specialty steel. With a history dating back to 1916, the Company has accumulated extensive skills in combining steel scrap with other materials to achieve the strength, workability and other characteristics to match exacting requirements. Along with the manufacture of value-added steel, the Company offers many services that leverage its technological resources. Most services target high-end market sectors that demand the highest levels of quality and specialization. Daido Steel is one of the leading players worldwide in the manufacture of critical steel components where nothing less than absolute reliability is acceptable. These components include automobile transmissions and engine parts as well as components used in ships, aircraft and electric generators. Daido Steel shares are traded on the First Section of the Tokyo Stock Exchange under the securities code 5471.

FORWARD-LOOKING STATEMENTS

This annual report contains forward-looking statements concerning DAIDO STEEL CO., LTD.'s and its Group companies' current plans, projections, strategies and performance. These forward-looking statements are not historical facts. Rather, they represent the assumptions and beliefs of Daido Steel's management based on information currently available.

They should therefore not be relied upon as the sole basis for evaluating the Company. Daido Steel also wishes to caution readers that actual results may differ materially from expectations, and that forward-looking statements are subject to a number of risks and uncertainties.

Overview of Results for Fiscal 2016

In fiscal 2016, the Japanese economy underwent a moderate recovery with signs of a rebound in industrial production in the corporate sector and gradual improvement in consumer spending. In Europe and the U.S., economic growth remained on a moderate trend with employment expanding, while major events included the U.K.'s decision to exit the European Union and the election of President Trump in the U.S. In China, economic growth was relatively stable, supported by government measures to stimulate the economy, which boosted sales of automobiles.

Under these economic circumstances, production increased in the automobile industry in the second half, owing to brisk sales in North America and China. Scrap steel prices were volatile in the spring, influenced by Chinese steel billet prices, achieved some stability, and then increased from autumn amid a rise in coking coal prices.

As a result, the Daido Steel Group's net sales decreased ¥15,454 million year on year to ¥445,123 million, owing to a decline in selling prices, which are linked to raw material prices. Ordinary income increased ¥1,265 million to ¥26,373 million due to higher sales volume. Net income attributable to owners of the parent grew ¥9,640 million to ¥16,386 million, reflecting the absence of

provisions for environmental remediation and extraordinary losses for discontinuing software development posted in the previous fiscal year.

Outlook for Fiscal 2017

The global economy is likely to keep expanding at a moderate pace amid robust employment conditions in advanced countries. The Chinese economy should see relatively stable growth thanks to government stimulus measures, although there are latent risks related to real estate prices and excessive debt. Based on this outlook, our core customers in the automobile industry should remain on solid footing. However, there are uncertainties as well, including the new administration in the U.S., the issue of the U.K.'s exit from the European Union, political risk in Europe and growing geopolitical risk. We will continue to monitor risks, such as the risk of weaker demand due to foreign exchange fluctuations and the risk of price fluctuations in raw materials and fuel.

In this business environment, we are constantly monitoring market trends and customers, and are prepared to respond to any changes. The Group will steadily implement measures for expanding overseas sales, which is a target of our medium-term business plan. The Group is working

diligently to strengthen quality, cost and delivery (QCD) competitiveness, while focusing on growth fields and co-creation with customers.

Given these conditions, our segment forecasts for the coming fiscal year are as follows.

SPECIALTY STEEL

We expect sales volume of structural steel in 2017 will continue to be at the same level as in the second half of fiscal 2016, based on the outlook for brisk global demand from automakers. In tool steel, we anticipate a gradual recovery in volume after the end to inventory adjustments. While we expect an increase in volume, we forecast cost increases in energy due to higher crude oil prices. Under these circumstances, we will strive to reduce costs further and focus efforts on improving the product mix by leveraging the secondary melting facility newly constructed at the Chita Plant during fiscal 2016.

HIGH PERFORMANCE MATERIALS AND MAGNETIC MATERIALS

We expect sales volume of stainless steel and high-alloy steel will continue to be at the same level as the second half of fiscal 2016, based on the assumption that demand remains strong for the automobile and semiconductor industries. In powder metal products, we are developing new products for future growth while fulfilling firm automobile-related demand. In magnetic products, we are concentrating on the increasing use of electronics in automobiles and electrical applications.

PARTS FOR AUTOMOBILE AND INDUSTRIAL EQUIPMENT

In free forgings, we are keeping up with ongoing brisk demand for civil aircraft, while waiting for demand recovery in the oil and gas sector. In die forgings, we will set up Daido Steel (Thailand) Co., Ltd. as a production base for the Southeast Asia region. In turbo-related products, we will respond to increasing production of stainless steel turbine housing, considering the likelihood of continued growth in demand from an increasing ratio of gasoline engines with turbos installed. In engine valves, we are updating our supply structure for North America, having launched operations at a new plant in Mexico.

ENGINEERING

The Daido Steel Group aims to expand sales of Premium STC® (Short Time Cycle), which is its mainstay STC® annealing furnace with a new combustion system installed, as well as increase sales of vacuum carburizing furnaces to auto parts makers, and of vacuum sintering furnaces to magnet product makers.

TRADING AND SERVICE

In the trading and service segment, demand should be the same level as in 2016.

Based on the above, for fiscal 2017, the Daido Steel Group forecasts consolidated net sales of ¥480.0 billion, operating income of ¥30.0 billion, ordinary income of ¥31.0 billion, and net income attributable to owners of the parent of ¥20.0 billion.

Medium- to Long-Term Management Strategy

During the current medium-term business plan that continues through fiscal 2017, advanced countries have continued to grow their economies at a moderate pace amid robust employment conditions. Growth in the Chinese economy has decelerated more than anticipated, and the pace of expansion in emerging markets has slowed down somewhat. The automobile industry continues to grow strongly. Resource- and energy-related demand should expand over the long run, but recently it has declined due to a fall in crude oil prices.

Meanwhile, customers may also demand higher performance from specialty steel. For example, customers may demand unprecedented performance in terms of the heat resistance and thinness of specialty steel in order to maximize internal combustion efficiency in internal combustion engines used in automobiles and the like amid tightening carbon dioxide regulations to combat global warming. The Daido Steel Group intends to work more closely with its customers to solve these challenging issues.

The Daido Steel Group celebrated its 100th anniversary in August 2016 by declaring a new Group management philosophy, "pursuing the potential of materials to support our future." With the materials and materials-related technologies of the Daido Steel Group, we will create new value by bringing out the hidden potential of materials with the ultimate objective of contributing to the development of society while discovering the unknown needs of people and society.

June 2017

Takeshi Ishiguro
President

SPECIALTY STEEL

Overview of Business

Specialty steel, the Company's core business, generates approximately 37% of consolidated net sales. Specialty steel is made by combining steel with alloys to add value in the form of properties such as resistance to heat, abrasions or rust. Because a range of special properties can be achieved by varying the types and amount of alloy, one of the special features of the business is that products are developed to meet the specific applications required by users. The automobile and industrial machinery sectors are the primary users of specialty steel, accounting for about 80% of sales in this business segment.

Tool steel from Daido Steel

Results of Operations

Sales volume for structural steel increased year on year, mainly due to favorable demand from the automotive sector, a major source of demand for this steel, in North America and China. Sales volume of tool steel decreased year on year due to the impact of inventory adjustments. The cost of steel scrap, the main raw material, had remained relatively stable after rising and falling sharply in early spring 2016 due to the impact of Chinese billet prices. However, since early autumn 2016, the cost of steel scrap has been increasing in response to rising coking coal prices.

As a result, the specialty steel segment's net sales in fiscal 2016 decreased 3.4% year on year to ¥164,636 million, due primarily to a decline in sales prices in line with raw material price movements. Operating income decreased by ¥1,747 million to ¥5,813 million, reflecting the impact of higher costs in connection with rising raw material prices since November, among other factors.

HIGH PERFORMANCE MATERIALS AND MAGNETIC MATERIALS

Overview of Business

This segment, which accounts for roughly 33% of consolidated net sales, manufactures and sells high performance materials and magnetic materials used chiefly in automobiles, computers, mobile phones and consumer electronics.

Key products include stainless steel products, rare earth magnets, high alloys, titanium products, and high performance powder metal products.

NEOQUENCH-DR (Nd-Fe-B ring magnets) for EPS motors

Results of Operations

Sales volume of stainless steel products increased year on year, driven by strong demand for use in automobiles and semiconductors. However, sales prices of stainless steel products declined in line with falling nickel prices. Sales volume of high alloys increased year on year atop higher demand from the automotive sector. Sales volume of magnetic products rose year on year primarily for use in electronic power steering systems. Powder metal products saw increased sales volume due to robust demand for use in automobile components overseas.

As a result, net sales for the high performance materials and magnetic materials segment in fiscal 2016 decreased 4.4% year on year to ¥148,468 million. Operating income rose by ¥5,085 million to ¥17,417 million as higher sales volume contributed positively to earnings.

PARTS FOR AUTOMOBILE AND INDUSTRIAL EQUIPMENT

Overview of Business

This segment contributes around 22% of consolidated net sales. It manufactures die forged parts such as crankshafts using specialty steel, precision cast parts for use in turbochargers, as well as engine valves, jet engine shafts and parts for gas turbines. Most of the auto parts sold in this segment use materials that were developed through joint projects with automakers to meet their exacting requirements. These parts can therefore lower processing expenses at customers' factories as well as contribute to reducing the weight of finished products.

In this segment, Daido Steel has a high market share in numerous product categories, including aircraft jet engine shafts, automobile engine valves and turbine wheels. We will continue to develop and launch new products that differentiate us from competitors and support our position as a provider of advanced parts.

In addition to specialty steel supplied by the specialty steel segment of the Group, some materials used in this segment are manufactured in-house.

Results of Operations

Net sales of free forged products decreased year on year, due to a large decline in demand from the oil and gas sector amid falling crude oil prices. Net sales of die forged products declined, mainly as a result of decreased sales prices linked to raw material prices and other factors. On the other hand, net sales of engine valves increased year on year, as automobile sales in North America and China remained strong. Net sales of precision cast products rose, reflecting continuing growth in turbocharger-related demand.

As a result, net sales in the parts for automobile and industrial equipment segment for fiscal 2016 decreased 2.2% year on year to ¥97,492 million. In terms of operating profitability, the segment recorded an operating loss of ¥516 million, a decline of ¥1,814 million from operating income recorded in the previous fiscal year. The operating loss was due to the impact of lower demand for free forged products, among other factors.

Jet Engine Shaft

ENGINEERING

Overview of Business

This segment generates about 5% of consolidated net sales. Major activities include the design and manufacture of, and related after-sales services for, melting and refining equipment such as arc furnaces and ladle furnaces (LF), heat treatment furnaces for auto parts such as vacuum carburizing furnaces and STC® (Short Time Cycle) annealing furnaces, and environmental equipment such as sewage sludge carbonization furnaces and automobile tunnel filters, as well as machine tools.

With respect to heat treatment furnaces for auto parts in particular, the operation and engineering technologies we have fostered over the years support our cutting-edge engineering business worldwide, in which we constantly maintain a grasp of current market needs. The many new types of equipment and technologies that this segment has created contribute to improvements in quality for customers and energy reduction in a wide variety of settings.

Results of Operations

In the engineering segment, despite strong overseas sales of certain products, the number of revenue-generating projects decreased as a whole. As a result, engineering segment sales for fiscal 2016 decreased 8.4% year on year to ¥23,918 million, while operating income decreased by ¥852 million to ¥1,219 million.

Daido Arc Process (DAP)

TRADING AND SERVICE

Overview of Business

The major activities of this segment, which accounts for approximately 3% of consolidated net sales, include the sale of products made by Group companies, employee benefits services, real estate and insurance services, golf course management, analytics, and sales of software to external customers.

Results of Operations

Net sales in the trading and service segment for fiscal 2016 rose 17.5% year on year to ¥10,608 million, while operating income increased by ¥410 million to ¥1,583 million. These increases partly reflected the conversion of Daido Steel (Shanghai) Co., Ltd. into a consolidated subsidiary in fiscal 2016.

Leveraging its advanced technology capabilities in specialty steel, the Daido Steel Group conducts a proactive program of research and development (R&D) to expand new products and businesses and strengthen the foundations for existing businesses.

We are pursuing R&D for new products, materials and technologies, primarily through the Daido Corporate Research & Development Center, which houses the Special Steel Research Lab, Electromagnetic Material Research Lab, and Process Technology Research Lab. We employ a total of 281 researchers throughout the Daido Steel Group.

R&D expenses for the Daido Steel Group during the fiscal year under review amounted to ¥6,205 million. An explanation of our R&D efforts by segment, including purpose, major achievements, and expenditures follows.

R&D EXPENDITURES

Years ended March 31

(millions of yen)

(1) Specialty Steel

In this segment, R&D includes basic material development, such as automotive structural materials and tool steel, and process innovations ranging from steelmaking, refining and solidification to quality assurance.

R&D costs for the fiscal year under review in this segment totaled ¥1,524 million. The following are major achievements in this area.

- **High-strength hot forging steel with superior processing features**

One challenge faced by automakers when using high-strength materials to reduce the weight of automotive parts is that these materials present problems in terms of processing features, such as machining capabilities.

Compared with conventional untempered steel, steel with superior processing features can be achieved by controlling the low-carbon bainitic structure, and hardness can be dramatically increased by using the age hardening phenomenon. This has enabled Daido Steel to achieve both lower processing costs and high strength.

Going forward, Daido Steel will work to achieve practical application of this technology in order to contribute to the miniaturization and weight reduction of automotive parts that use untempered steel, such as crankshafts, connecting rods, and fuel injection parts.

- **Phased array ultrasonic testing technology**

Daido Steel uses ultrasonic testing to assure the internal quality of specialty steel products. In order to fulfill customer requests for strict quality control, Daido Steel has developed high-precision testing technologies for all steps within the manufacturing process.

Daido Steel aims to achieve practical application of testing technologies for steel billets and steel bar products. We have already increased our quality assurance capabilities by

introducing high-precision automated testing equipment for titanium bars for medical applications.

(2) High Performance Materials and Magnetic Materials

In this segment the Daido Steel Group conducts R&D focusing on developing materials that resist corrosion and heat, high-grade strip steel, welding materials, magnetic materials and electronic devices.

R&D costs for the fiscal year under review in this segment totaled ¥3,086 million. The following are some of our major achievements in this area.

- **High-nitrogen stainless steel DSR40N**

The element nitrogen can be used effectively to improve both the strength and corrosion resistance of stainless steel.

By maximizing these benefits of nitrogen, Daido Steel has successfully developed stainless steel with a hardness of over 58 HRC and a corrosion resistance equivalent to SUS 630.

This high-nitrogen stainless steel can be used in highly corrosive environments where the use of conventional steel was previously impractical. In fact, this stainless steel is already being used for machine blades and bearings.

Going forward, Daido Steel's high-nitrogen stainless steel is expected to be used in a wide range of applications, such as automotive parts, for which there is growing demand for highly corrosion-resistant materials.

- **Heavy rare earth-free magnet for HEV**

Daido Electronics Co., Ltd., a member of the Daido Steel Group, manufactures ring magnets using its proprietary hot deformation method. Daido Electronics has developed a new plate magnet by applying this technology.

The new plate magnet features high heat resistance made possible by controlling the structural properties of the material. Without adding any heavy rare earth elements, the magnet can

be used in the primary motors of hybrid vehicles.

Encouraged by the adoption of this new magnet by Japanese automakers, Daido Steel will seek to expand its use going forward.

(3) Parts for Automobile and Industrial Equipment

R&D in this segment concentrates on development of turbochargers, engine valves and other automotive parts, as well as parts for various types of industrial machinery.

R&D costs for the fiscal year under review in this segment totaled ¥1,449 million. The following is one of our major achievements in this area.

- **Welding technology for water-cooled wall panels**

In order to improve the corrosion and wear resistance of water-cooled wall panels applied to the interior walls of furnaces exposed to high temperatures at thermal power plants, waste incinerators and other facilities, Daido Steel has developed a technology for welding high-alloy steel onto the panel surfaces through an on-site installation process.

Daido Steel employs the Plasma Powder Welding (PPW) method, which enables installation with a lower dilution ratio and a thinner layer than the metal inert gas (MIG) method using welding wires. Daido Steel has established a technology for smoothly forming a welding layer on panel surfaces in an upright position by properly controlling the powder supply.

(4) Engineering

Engineering R&D focuses on the development of environmental conservation and recycling equipment and a variety of energy-saving industrial furnaces.

R&D expenditures in this segment during the fiscal year under review amounted to ¥145 million.

Basic Policy

The Daido Steel Group considers it extremely important for contemporary corporations to take on a role that extends beyond economic activities and to contribute to the sustainable development of society through environmentally conscious activities and involvement in the resolution of social issues.

The Daido Steel Group is playing a part in helping to create a recycling-oriented economy and society through its primary business operations: the manufacture and sale of specialty steel largely created from recycled scrap steel. Daido Steel is also engaged in a broad range of initiatives, including developing a variety of environmental activities, abiding firmly by our corporate ethics, striving for disclosure to increase the transparency of management, and creating a safe and pleasant place for employees to work.

Major Initiatives

Preventing Global Warming

The first commitment period for the Kyoto Protocol ran from 2008 to 2012. In that time frame, Daido Steel aimed to reduce its CO₂ emissions volume by 10% compared to the 1990 level in accordance with the guidelines of the Japan Iron and Steel Federation. We worked to achieve this goal by expanding the use of exhaust heat recovery in heating furnaces, shifting our fuel source from heavy oil to natural gas, and improving the yield ratio through an increase in the ratio of production by continuous casters. Due to the effects of cumulative investments of ¥5.0 billion made from 2006 to 2012, operational improvements and changes in production levels, annual CO₂ emissions from 2008 to 2012 decreased by 24.7% on average. In addition, in fiscal 2014, a cutting-edge, energy-efficient electric arc furnace was

installed at the Chita Plant at a cost of ¥19.8 billion with rationalizing effects evident throughout the year, resulting in a 3% improvement in CO₂ emissions per ton of production. We continued to introduce the latest energy saving technologies, resulting in further improvements in CO₂ emissions in fiscal 2016.

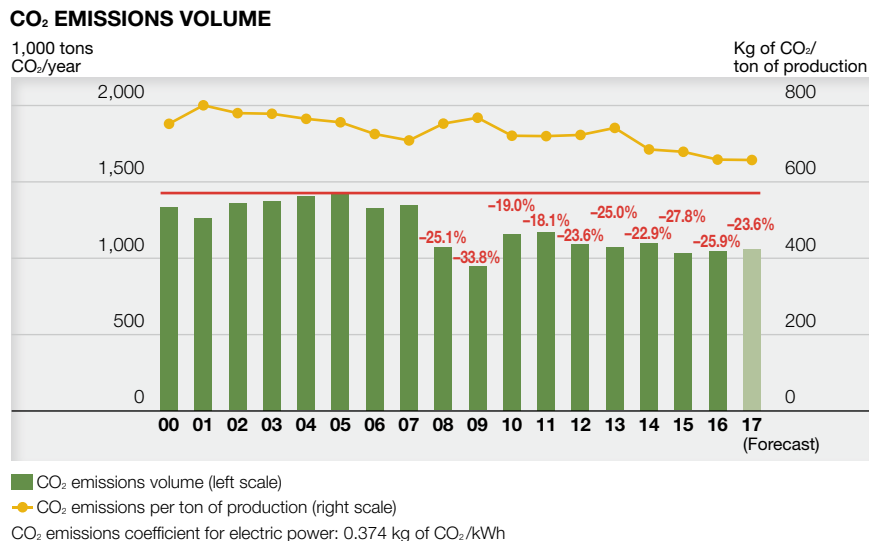

Going forward, in accordance with the objectives of the Commitment to a Low Carbon Society ongoing plan for fiscal 2013 to fiscal 2020 formulated by the Japan Iron and Steel Federation and Japan Business Federation (Keidanren), we will continue implementing further reform measures, such as introduction of energy-saving advanced technologies, reductions in the number of heat exchangers, improvements in the yield ratio, and production in optimal areas.

Strengthening the CSR Promotion Framework

The Daido Steel Group has responded to the needs of our various stakeholders by establishing the Human Resources Labor Committee and various other committees as parent organizations to support CSR activities, such as the Environment and Energy Committee. With a view to further strengthening this framework, in fiscal 2007, the CSR Committee was established to supervise general CSR activities. Members of the CSR Committee formulate Group-wide policies and action plans with the aim of unifying and expanding CSR activities across all Group companies and divisions.

Starting January 2013, the Environment and Energy Committee was split into two independent committees (namely, the Environment Committee and the Energy Committee) to promote CSR activities in a more fulfilling way.

For details, please refer to the annually issued CSR Report. URL: <http://www.daido.co.jp/csr/data/report.html> (Japanese only)

Basic Policy

Daido Steel views corporate governance as one of the key issues for management in today's rapidly changing business environment. We strive to increase management efficiency, accelerate and improve decision-making, and ensure management transparency.

In addition, in order to clarify our responsibilities as a company contributing to society, Daido Steel has established a Risk Management Committee. The Company has also implemented the Daido Steel Corporate Code of Ethics, and is working to improve its basic structure as a company open to society. In order to ensure the reliability of its financial reporting, the Company has set up an Internal Control Committee.

Governance System

Daido Steel uses an Audit & Supervisory Board system. By using a system that supervises and oversees business execution through a Board of Directors, including two external directors, and an Audit & Supervisory Board, including two external Audit & Supervisory Board members, Daido Steel enhances its corporate governance, optimizes and accelerates decision-making and secures fair and transparent management.

At the 91st Shareholders' Meeting held on June 26, 2015, the Company also instituted an executive officer system to clearly distinguish the responsibilities of strategy formulation and management oversight functions and business execution.

Internal Control System

Risk Management Initiatives

Daido Steel emphasizes risk management and legal compliance in its management. To this end, the Company has set out basic points for risk management in the Risk Management Regulations. In addition, the Risk Management Committee discusses management of projected upcoming and latent risks within the Group. The Company has appointed a director who is responsible for the Company-wide supervision of risk management and compliance.

In preparation for a major accident or other problem, relevant information is shared with all concerned people, and speedy and smooth countermeasures are formulated. The Company has also formulated regulations for emergency countermeasures in the event of a major accident, aimed at minimizing the impact of the accident or other problem on business activities, and disseminated the regulations to all employees and Group companies.

Furthermore, in response to any major share-purchase activity (for example, purchases of the Company's shares aimed at increasing the voting rights of a specific shareholders' group to over 20%), Daido Steel will implement takeover defense measures from the perspective of ensuring and improving corporate value and, by extension, the shared beneficial interests of all shareholders.

Efforts to Enhance Compliance

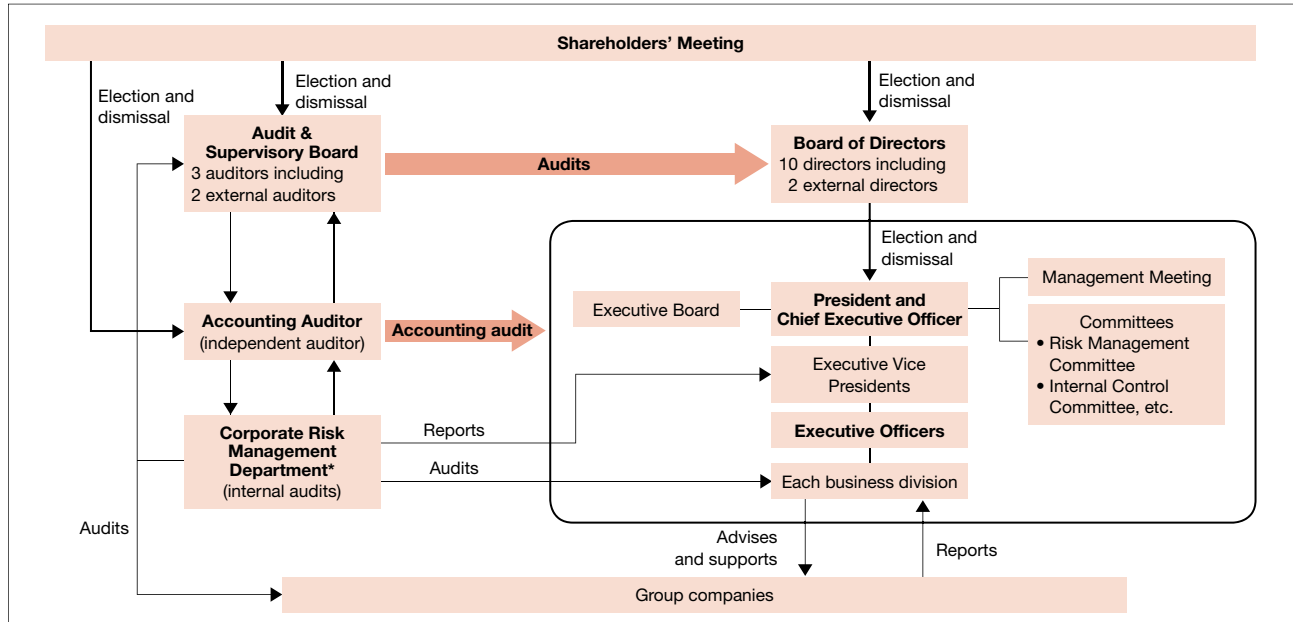

Daido Steel has established the Daido Steel Corporate Code of Ethics and the Daido Steel Code of Conduct, and works to disseminate them to all employees and Group companies. The Company also maintains a hotline for consultation and reporting by employees regarding compliance, as well as directors in charge, divisions in charge and outside attorneys.

Efforts to Ensure the Reliability of Financial Reporting

In order to ensure the reliability of financial reporting and enhance the level of response of the Company and Group companies to J-SOX, the Daido Steel Group prescribes the basic points for system improvement and operation in the Internal Control Regulations and has established an Internal Control Committee.

MECHANISM FOR BUSINESS EXECUTION, AUDIT, SUPERVISION AND INTERNAL CONTROL

(As of June 28, 2017)

* As of June 28, 2017, Daido has realigned its organization to strengthen the auditing and risk management operations, and changed the Auditing Department to the Corporate Risk Management Department.

OVERVIEW OF OPERATING ENVIRONMENT AND PERFORMANCE

In fiscal 2016, ended March 31, 2017, the Japanese economy tracked a gradual recovery path, underpinned by an upturn in consumer spending on the back of continued improvement in employment and income conditions, along with signs of a rebound in industrial production in the corporate sector. In Europe and the U.S., there were major developments including the U.K.'s decision to withdraw from the European Union and President Trump coming to power in the U.S. Economic expansion continued at a moderate pace, driven by growth in employment. Supported by government economic stimulus policies, China posted relatively steady growth, including a significant increase in automobile sales volume.

Under these economic circumstances, production in the automobile industry, our key source of demand for specialty steel, increased in the second half in response to solid sales in North America and China. The price of steel scrap, a key raw material, had remained relatively stable after rising and falling sharply in early spring 2016 due to the impact of Chinese billet prices. However, since early autumn 2016, the cost of steel scrap has been increasing in response to rising coking coal prices.

As a result, the Group's net sales in fiscal 2016 decreased ¥15,454 million to ¥445,123 million, due primarily to a decline in sales prices in line with raw material price movements. Ordinary income rose ¥1,265 million to ¥26,373 million, due to the positive contribution of higher sales volumes and other factors. Net

income attributable to owners of the parent increased by ¥9,640 million to ¥16,386 million, reflecting the absence of extraordinary losses for discontinuing software development and provisions for environmental remediation recorded in the previous fiscal year.

BUSINESS SEGMENT PERFORMANCE

Specialty Steel

Sales volume for structural steel increased year on year, mainly due to favorable demand from the automotive sector, a major source of demand for this steel, in North America and China. Sales volume of tool steel decreased year on year due to the impact of inventory adjustments. The cost of steel scrap, the main raw material, had remained relatively stable after rising and falling sharply in early spring 2016 due to the impact of Chinese billet prices. However, since early autumn 2016, the cost of steel scrap has been increasing in response to rising coking coal prices.

As a result, the specialty steel segment's net sales in fiscal 2016 fell 3.4% year on year to ¥164,636 million, due primarily to a decline in sales prices in line with raw material price movements. Operating income decreased by ¥1,747 million to ¥5,813 million, reflecting the impact of higher costs in connection with rising raw material prices since November, among other factors.

NET SALES

(millions of yen)

OPERATING INCOME

Years ended March 31

(millions of yen)

NET INCOME ATTRIBUTABLE TO OWNERS OF THE PARENT

Years ended March 31

(millions of yen)

High Performance Materials and Magnetic Materials

Sales volume of stainless steel products increased year on year, driven by strong demand for use in automobiles and semiconductors. However, sales prices of stainless steel products declined in line with the falling nickel prices. Sales volume of high alloys increased year on year atop higher demand from the automotive sector. Sales volume of magnetic products rose year on year primarily for use in electronic power steering systems. Powder metal products saw increased sales volume due to robust demand for use in automobile components overseas.

As a result, net sales for the high performance materials and magnetic materials segment in fiscal 2016 decreased 4.4% year on year to ¥148,468 million. Operating income rose by ¥5,085 million to ¥17,417 million as higher sales volume contributed positively to earnings.

Parts for Automobile and Industrial Equipment

Net sales of free forged products decreased year on year, due to a large decline in demand from the oil and gas sector amid falling crude oil prices. Net sales of die forged products declined, mainly as a result of decreased sales prices linked to raw material prices and other factors. On the other hand, net sales of engine valves increased year on year, as automobile sales in North America and China remained strong. Net sales of precision cast products rose, reflecting continuing growth in turbocharger-related demand.

As a result, net sales in the parts for automobile and industrial equipment segment for fiscal 2016 decreased 2.2% year on year to ¥97,492 million. In terms of operating profitability, the segment recorded an operating loss of ¥516 million, a decline of ¥1,814 million from operating income recorded in the previous fiscal year. The operating loss was due to the impact of lower demand for free forged products, among other factors.

Engineering

In the engineering segment, despite strong overseas sales of certain products, the number of revenue-generating projects decreased as a whole. As a result, engineering segment sales for fiscal 2016 decreased 8.4% year on year to ¥23,918 million, while operating income decreased by ¥852 million to ¥1,219 million.

Trading and Service

Net sales in the trading and service segment for fiscal 2016 rose 17.5% year on year to ¥10,608 million, while operating income increased by ¥410 million to ¥1,583 million. These increases partly reflected the conversion of Daido Steel (Shanghai) Co., Ltd. into a consolidated subsidiary in fiscal 2016.

CAPITAL EXPENDITURES

Capital expenditures by business segment during the fiscal year under review are shown in the table below.

Figures in the table include intangible fixed assets in addition to property, plant and equipment.

RESEARCH AND DEVELOPMENT

R&D costs for the entire Daido Steel Group during the fiscal year under review totaled ¥6,205 million. The research objectives, main achievements and R&D costs in each business segment were as follows:

(1) Specialty Steel

Daido Steel bears the principal responsibility for carrying out specialty steel R&D. Research areas include basic material development, such as automotive structural steel and tool steel. Other areas of emphasis are development of process innovations ranging from steelmaking, refining and solidification to quality assurance for finished products.

Specialty steel R&D costs during the fiscal year under review totaled ¥1,524 million.

(2) High Performance Materials and Magnetic Materials

Development of materials that resist corrosion and heat, high-grade strip steel, welding materials, electromagnetic materials, and other basic materials, as well as R&D of electronic devices, is conducted mainly by Daido Steel. R&D costs in this segment during the fiscal year under review amounted to ¥3,086 million.

Total	¥28,940	¥23,205	24.7

CAPITAL EXPENDITURES

Years ended March 31

(millions of yen)

(3) Parts for Automobile and Industrial Equipment

Mainly the responsibility of Daido Steel, R&D in this segment concentrates on development of turbochargers, engine valves and other automotive parts, and parts for various types of industrial machinery. R&D costs for the fiscal year under review in this segment totaled ¥1,449 million.

(4) Engineering

Engineering R&D is carried out primarily by Daido Steel, focused on development of environmental conservation and recycling equipment and a variety of energy-saving industrial furnaces. Engineering R&D costs during the fiscal year under review were ¥145 million.

(5) Trading and Service

There are no R&D activities in this segment.

FINANCIAL POSITION

Cash Flows

Cash and cash equivalents as of March 31, 2017 (hereafter, "cash") amounted to ¥33,686 million, representing a decrease of ¥88 million year on year.

Cash Flows from Operating Activities

Net cash provided by operating activities amounted to ¥28,391 million, decreasing by ¥17,341 million from the previous fiscal year. This mainly reflected income before income taxes of ¥27,355 million.

Cash Flows from Investing Activities

Net cash used in investing activities totaled ¥26,449 million, increasing by ¥3,284 million from the previous fiscal year. The major cash outflows included ¥27,893 million in purchases of property, plant, and equipment.

Cash Flows from Financing Activities

Net cash used in financing activities was ¥1,843 million, decreasing by ¥18,321 million from the previous fiscal year. The main use of cash was ¥4,988 million for the acquisition of treasury stock.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DAIDO STEEL CO., LTD. AND CONSOLIDATED SUBSIDIARIES
YEAR ENDED MARCH 31, 2017

1. BASIS OF PRESENTATION OF CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements have been prepared in accordance with the provisions set forth in the Japanese Financial Instruments and Exchange Act and its related accounting regulations and in accordance with accounting principles generally accepted in Japan (“Japanese GAAP”), which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards.

In preparing these consolidated financial statements, certain reclassifications and rearrangements have been made to the consolidated financial statements issued domestically in order to present them in a form which is more familiar to readers outside Japan. In addition, certain reclassifications have been made in the 2016 consolidated financial statements to conform to the classifications used in 2017.

The consolidated financial statements are stated in Japanese yen, the currency of the country in which DAIDO STEEL CO., LTD. (the “Company”) is incorporated and operates. The translations of Japanese yen amounts into U.S. dollar amounts are included solely for the convenience of readers outside Japan and have been made at the rate of ¥112 to \$1, the approximate rate of exchange at March 31, 2017. Such translations should not be construed as representations that the Japanese yen amounts could be converted into U.S. dollars at that or any other rate.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Consolidation

The Company had 67 (67 in 2016) subsidiaries and 13 (17 in 2016) associated companies at March 31, 2017. The consolidated financial statements as of March 31, 2017, include the accounts of the Company and 34 (34 in 2016) significant subsidiaries (together, the “Group”).

Under the control and influence concepts, those companies in which the Company, directly or indirectly, is able to exercise control over operations are fully consolidated and those companies over which the Group has the ability to exercise significant influence are accounted for by the equity method.

Investments in six associated companies were accounted for by the equity method for the years ended March 31, 2017 and 2016. Investments in other unconsolidated subsidiaries and associated companies are stated at cost. If the equity method of accounting had been applied to the investments in these companies, the effect on the accompanying consolidated financial statements would not have been material.

The fiscal years of the consolidated subsidiaries are not necessarily the same as that of the Company. Accounts of those subsidiaries which have different fiscal years have been adjusted for significant transactions to properly reflect their financial position at March 31 of each year and the results of operations for the year then ended.

The difference between the cost of acquisition and the fair value of the net assets of the acquired subsidiary at the date of acquisition is being amortized on a straight-line basis over five years.

All significant intercompany balances and transactions have been eliminated in consolidation. All material unrealized profit included in assets resulting from transactions within the Group is also eliminated.

(b) Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated Financial Statements

The Accounting Standards Board of Japan (ASBJ) issued ASBJ Practical Issues Task Force (PITF) No. 18, “Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated Financial Statements,” advising that accounting policies and procedures applied to a parent company and its subsidiaries for similar transactions and events under similar circumstances should in principle be unified for the preparation of the consolidated financial statements. However, financial statements prepared by foreign subsidiaries in accordance with either International Financial Reporting Standards or the accounting principles generally accepted in the United States of America (Financial Accounting Standards Board Accounting Standards Codification—“FASB ASC”) tentatively may be used for the consolidation process, except for the following items which should be adjusted in the consolidation process so that net income is accounted for in accordance with Japanese GAAP unless they are not material: a) amortization of goodwill; b) scheduled amortization of actuarial gain or loss of pensions that has been recorded in equity through other comprehensive income; c) expensing capitalized development costs of research and development; and d) cancellation of the fair value model accounting for property, plant, and equipment and investment properties and incorporation of cost model accounting.

(c) Business Combinations

Business combinations are accounted for using the purchase method. Acquisition-related costs, such as advisory fees or professional fees, are accounted for as expenses in the periods in which the costs are incurred. If the initial accounting for a business combination is incomplete by the end of the reporting period in which the business combination occurs, an acquirer shall report in its financial statements provisional amounts for the items for which the accounting is incomplete. During the measurement period, which shall not exceed one year from the acquisition, the acquirer shall retrospectively adjust the provisional amounts recognized at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and that would have affected the measurement of the amounts recognized as of that date. Such adjustments shall be recognized as if the accounting for the business combination had been completed at the acquisition date. A parent's ownership interest in a subsidiary might change if the parent purchases or sells ownership interests in its subsidiary. The carrying amount of noncontrolling interest is adjusted to reflect the change in the parent's ownership interest in its subsidiary while the parent retains its controlling interest in its subsidiary. Any difference between the fair value of the consideration received or paid and the amount by which the noncontrolling interest is adjusted is accounted for as capital surplus as long as the parent retains control over its subsidiary.

(d) Cash and Cash Equivalents

Cash equivalents are short-term investments that are readily convertible into cash and that are exposed to insignificant risk of changes in value. Cash equivalents include time deposits and short-term investments which mature or become due within three months of the date of acquisition.

(e) Investment Securities

Investment securities are classified and accounted for, depending on management's intent, as follows:

Available-for-sale securities are reported at fair value, with unrealized gains and losses, net of applicable taxes, reported as a separate component of equity.

A limited partnership investment is accounted for by the equity method.

Non-marketable securities are stated at cost, determined by the moving-average method. For other-than-temporary declines in fair value, investment securities are reduced to net realizable value by a charge to income.

(f) Inventories

Inventories are stated at the lower of cost, mainly determined by the weighted-average method or net selling value. A reversal of allowance for inventory valuation of ¥523 million (\$4,670 thousand) for the year ended March 31, 2017 and a write-down of inventory of ¥604 million for the year ended March 31, 2016 were included in cost of sales.

(g) Allowance for Doubtful Accounts

To provide for the loss from doubtful accounts, an allowance for doubtful accounts is made using the historical rate of actual losses for normal receivables and the estimated irrecoverable amount for specific doubtful receivables after considering the recoverability of each account.

(h) Property, Plant, and Equipment

Property, plant, and equipment are stated at cost, less gains on grant receipts, etc. Under certain conditions, such as government grant receipts, exchanges of fixed assets of similar kinds, and sales and purchases resulting from expropriation, Japanese tax laws permit companies to defer the profit arising from such transactions by reducing the cost of the assets acquired or by providing a special reserve in the equity section. The acquisition costs of property, plant, and equipment were reduced in the amounts of ¥4,585 million (\$40,938 thousand) and ¥4,678 million at March 31, 2017 and 2016, respectively.

Depreciation of certain plants of the Company and certain domestic and foreign subsidiaries is computed by the straight-line method. Depreciation of other plants of the Company and other subsidiaries is computed by the declining-balance method, while the straight-line method is applied to buildings acquired on or after April 1, 1998, and building improvements and structures acquired on or after April 1, 2016, for domestic companies.

Pursuant to an amendment to the Corporate Tax Act, the Company adopted ASBJ Practical Issues Task Force No. 32 "Practical

Solution on a Change in Depreciation Method Due to Tax Reform 2016,” and changed the depreciation method for building improvements and structures acquired on or after April 1, 2016, from the declining-balance method to the straight-line method. The effect of this amendment was immaterial to the consolidated financial statements.

Depreciation of leased assets is computed by the straight-line method over the lease period.

The range of useful lives is from 5 to 75 years for buildings and structures and from 4 to 17 years for machinery and equipment.

(i) Land Revaluation

Under the “Law of Land Revaluation,” Nippon Drop Forge Co., Ltd., a consolidated subsidiary, elected a one-time revaluation of its own-use land to a value based on real estate appraisal information at March 31, 1999. The resulting land revaluation surplus represented unrealized appreciation of land and was stated, net of income taxes, as a component of equity. Continuous readjustment is not permitted, unless the land value subsequently declines significantly such that the amount of the decline in value should be removed from the land revaluation surplus account and related deferred tax liabilities. At March 31, 2017, the carrying amount of the land after the above one-time revaluation and impairment exceeded the market value by ¥920 million (\$8,214 thousand).

(j) Long-Lived Assets

The Group reviews its long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset or asset group may not be recoverable. An impairment loss would be recognized if the carrying amount of an asset or asset group exceeds the sum of the undiscounted future cash flows expected to result from the continued use and eventual disposition of the asset or asset group. The impairment loss would be measured at the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of the discounted cash flows from the continued use and eventual disposition of the asset or the net selling price at disposition.

(k) Other Assets

Intangible assets are amortized by the straight-line method. Software costs are amortized over five years.

(l) Bond Issue Costs

Bond issue costs are charged to income as incurred.

(m) Retirement and Pension Plans

The Company and its domestic consolidated subsidiaries have defined retirement benefit plans and unfunded pension plans. Certain consolidated subsidiaries have defined contribution pension plans, multi-employer contributory funded pension plans and smaller enterprise retirement allowance mutual aid plans.

The Group accounts for the liability for retirement benefits based on the projected benefit obligations and plan assets at the balance sheet date. The projected benefit obligations are attributed to periods on a benefit formula basis. Actuarial gains and losses and past service costs that are yet to be recognized in profit or loss are recognized within equity (accumulated other comprehensive income), after adjusting for tax effects and are recognized in profit or loss over 10 years, no longer than the expected average remaining service period of the employees.

Retirement benefits to directors and Audit & Supervisory Board members of certain subsidiaries are provided at the amount that would be required if all directors and Audit & Supervisory Board members retired at the consolidated balance sheet date.

(n) Provision for Environmental Measures

A provision for environmental measures is provided to accrue the estimated costs of PCB (Polychlorinated Biphenyl) waste disposals and the estimated costs of removal of steel slag products sold in reserve for future expenses. The estimated costs of removal of steel slag products used in construction projects by the Ministry of Land, Infrastructure, Transport and Tourism, Gunma Prefecture, and municipalities in Gunma were accrued and included in the provision for environmental measures in the consolidated statement of income.

(o) Asset Retirement Obligations

An asset retirement obligation is defined as a legal obligation imposed either by law or contract that results from the acquisition,

construction, development, and the normal operation of a tangible fixed asset and is associated with the retirement of such tangible fixed asset. The asset retirement obligation is recognized as the sum of the discounted cash flows required for the future asset retirement and is recorded in the period in which the obligation is incurred if a reasonable estimate can be made. If a reasonable estimate of the asset retirement obligation cannot be made in the period the asset retirement obligation is incurred, the liability should be recognized when a reasonable estimate of asset retirement obligation can be made. Upon initial recognition of a liability for an asset retirement obligation, an asset retirement cost is capitalized by increasing the carrying amount of the related fixed asset by the amount of the liability. The asset retirement cost is subsequently allocated to expense through depreciation over the remaining useful life of the asset. Over time, the liability is accreted to its present value each period. Any subsequent revisions to the timing or the amount of the original estimate of undiscounted cash flows are reflected as an adjustment to the carrying amount of the liability and the capitalized amount of the related asset retirement cost.

(p) Research and Development Costs

Research and development costs are charged to income as incurred.

(q) Bonuses to Directors and Audit & Supervisory Board Members

Bonuses to directors and Audit & Supervisory Board members are accrued at the year-end to which such bonuses are attributable.

(r) Construction Contracts

Construction revenue and construction costs should be recognized by the percentage-of-completion method if the outcome of a construction contract can be estimated reliably. When total construction revenue, total construction costs, and the stage of completion of the contract at the balance sheet date can be reliably measured, the outcome of a construction contract can be estimated reliably. If the outcome of a construction contract cannot be reliably estimated, the completed-contract method should be applied. When it is probable that the total construction costs will exceed total construction revenue, an estimated loss on the contract should be immediately recognized by providing for a loss on construction contracts.

(s) Income Taxes

The provision for income taxes is computed based on the pretax income included in the consolidated statement of income. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Deferred taxes are measured by applying currently enacted tax laws to the temporary differences.

The Group applied ASBJ Guidance No. 26, "Guidance on Recoverability of Deferred Tax Assets," effective April 1, 2016.

(t) Foreign Currency Transactions

All short-term and long-term monetary receivables and payables denominated in foreign currencies are translated into Japanese yen at the exchange rates at the consolidated balance sheet date. The foreign exchange gains and losses from translation are recognized in the consolidated statement of income to the extent that they are not hedged by forward exchange contracts.

(u) Foreign Currency Financial Statements

The consolidated balance sheet accounts, and revenue and expense accounts of the consolidated foreign subsidiaries are translated into Japanese yen at the current exchange rate as of the consolidated balance sheet date except for equity, which is translated at the historical rate. Differences arising from such translation are shown as "Foreign currency translation adjustments" under accumulated other comprehensive income in a separate component of equity.

(v) Derivatives and Hedging Activities

The Group uses derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange and interest rates. Foreign currency forward contracts, currency swaps and interest rate swaps are utilized by the Group to reduce foreign currency exchange and interest rate risks. The Group does not enter into derivatives for trading or speculative purposes.

Derivative financial instruments and foreign currency transactions are classified and accounted for as follows: a) all derivatives are recognized as either assets or liabilities and measured at fair value, and, except for those derivatives which qualify for hedge accounting, gains or

losses are recognized in the consolidated statement of income and b) for derivatives used for hedging purposes, if such derivatives qualify for hedge accounting because of high correlation and effectiveness between the hedging instruments and the hedged items, gains or losses are deferred until maturity of the hedged transactions.

Foreign currency forward contracts are measured at fair value, and the unrealized gains (losses) are recognized in the consolidated statement of income. Forward contracts used to hedge forecasted (or committed) transactions are also measured at fair value, but the unrealized gains (losses) are deferred until the underlying transactions are completed.

Long-term debt denominated in foreign currencies for which currency swaps are used to hedge the foreign currency fluctuations is translated at the contracted rate if the swaps qualify for hedge accounting.

Interest rate swaps which qualify for hedge accounting and meet specific matching criteria are not remeasured at market value but the differential paid or received under the swap agreements is recognized and included in interest expense.

(w) Per Share Information

Net income per share is computed by dividing net income attributable to common shareholders by the weighted-average number of common shares outstanding for the period.

Diluted net income per share is not disclosed because the Group had no dilutive shares at March 31, 2017 and 2016.

Cash dividends per share presented in the accompanying consolidated statement of income are dividends applicable to the respective years including dividends to be paid after the end of year.

3. BUSINESS COMBINATIONS

Year Ended March 31, 2017

(Transaction under common control)

On October 1, 2016, the Company acquired shares of Daido Kogyo Co., Ltd. ("Daido Kogyo"), a consolidated subsidiary of the Company, by issuing the Company's shares to all of the shareholders of Daido Kogyo in exchange for all of the outstanding shares of Daido Kogyo. As a result, Daido Kogyo became a wholly owned subsidiary of the Company.

a. Outline of the business combination

(1) Name of the company and its business outline

Name of the company: Daido Kogyo Co., Ltd.

Business outline: Sale, export and import of specialty steel, nonferrous metals, materials, machinery, etc.

(2) Date of business combination

October 1, 2016

(3) Legal form of business combination

Stock exchange

(4) Name of the company after the business combination

No change

(5) Outline of the business combination

This stock exchange was made in order to strengthen the marketing initiatives in foreign countries and to establish efficient business models for the turbo materials, magnetic and high alloy businesses.

b. Accounting method

The business combination was accounted for as a transaction with noncontrolling interests.

c. Acquisition of the subsidiary's shares

(1) The Company acquired the subsidiary's shares in exchange for the Company's treasury stock in the amount of ¥5,245 million (\$46,830 thousand).

(2) The exchange ratio, formula and number of shares issued to shareholders of noncontrolling interests

The Company allotted 1.53 shares per 1 shares of Daido Kogyo.

The Company and Daido Kogyo determined the exchange ratio by referencing the stock valuation of Daido Kogyo by The Bank of

Tokyo Mitsubishi UFJ, Ltd., a third party. The discounted cash flow method was used in the valuation. 11,379,417 shares were allotted to noncontrolling shareholders of Daido Kogyo.

d. Transactions with noncontrolling shareholders

As a result of the transactions with noncontrolling shareholders, capital surplus increased by ¥715 million (\$6,384 thousand).

4. INVESTMENT SECURITIES

Investment securities at March 31, 2017 and 2016, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Noncurrent:			
Equity securities	¥76,310	¥53,433	\$681,339
Total	¥76,310	¥53,433	\$681,339

The costs and aggregate fair values of investment securities at March 31, 2017 and 2016, were as follows:

	Millions of Yen			
	Cost	Unrealized Gains	Unrealized Losses	Fair Value
March 31, 2017				
Available-for-sale:				
Equity securities	¥44,604	¥30,258	¥526	¥74,336

March 31, 2016	Millions of Yen			
	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Available-for-sale:				
Equity securities	¥32,383	¥20,701	¥1,596	¥51,488

	Thousands of U.S. Dollars			
	Cost	Unrealized Gains	Unrealized Losses	Fair Value
March 31, 2017				
Available-for-sale:				
Equity securities	\$398,250	\$270,160	\$4,696	\$663,714

Information for available-for-sale securities that were sold during the years ended March 31, 2017 and 2016, was as follows:

	Millions of Yen			Thousands of U.S. Dollars		
	Proceeds	Realized Gains	Realized Losses	Proceeds	Realized Gains	Realized Losses
March 31, 2017						
Available-for-sale:						
Equity securities	¥26	¥6	¥0	\$232	\$54	\$3

March 31, 2016	Millions of Yen		
	Proceeds	Realized Gains	Realized Losses
Available-for-sale:			
Equity securities	¥2,503	¥467	¥52

Impairment losses on equity securities and investments in associated companies for the years ended March 31, 2017 and 2016, were ¥75 million (\$670 thousand) and ¥34 million, respectively.

5. INVENTORIES

Inventories held by the Group at March 31, 2017 and 2016, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Merchandise	¥18,151	¥18,764	\$162,062
Finished products	11,724	11,803	104,679
Semifinished products	18,201	15,976	162,509
Work in process	22,060	21,738	196,964
Raw materials	17,081	16,207	152,509
Supplies	11,261	10,643	100,545
Total	¥98,478	¥95,131	\$879,268

6. LONG-LIVED ASSETS

The Group reviewed its long-lived assets for impairment as of March 31, 2017 and 2016. As a result, the Group recognized an impairment loss of ¥1,957 million (\$17,473 thousand) as other expense for property, plant and equipment located in Gifu due to devaluation; the carrying amount of the relevant assets was written down to the recoverable amount for the year ended March 31, 2017. The Group recognized an impairment loss of ¥436 million as other expense for property, plant and equipment located in Nagano due to devaluation; the carrying amount of the relevant assets was written down to the recoverable amount for the year ended March 31, 2016. Moreover, the Group recognized an impairment loss of ¥5,162 million as other expense for discontinued software development costs for internal use; the carrying amount of the relevant assets was written down to the recoverable amount for the year ended March 31, 2016. Such amount is included in loss on discontinued software development of ¥5,586 million.

7. INVESTMENT PROPERTY

The Company and certain consolidated subsidiaries hold some rental properties, such as office buildings and land in Aichi and other areas. The net amounts of rental income and operating expenses for those rental properties were ¥848 million (\$7,571 thousand) and ¥892 million for the years ended March 31, 2017 and 2016, respectively. Gain on sales of rental property was ¥194 million (\$1,732 thousand) for the year ended March 31, 2017.

The carrying amounts, changes in such balances and fair values of such properties at March 31, 2017 and 2016, were as follows:

Millions of Yen				Thousands of U.S. Dollars			
Carrying Amount			Fair Value	Carrying Amount			Fair Value
March 31, 2016	Increase, net	March 31, 2017	March 31, 2017	March 31, 2016	Increase, net	March 31, 2017	March 31, 2017
¥5,655	¥233	¥5,422	¥24,692	\$50,491	\$2,080	\$48,411	\$220,464

Millions of Yen			
Carrying Amount			Fair Value
March 31, 2015	Increase, net	March 31, 2016	March 31, 2016
¥5,197	¥458	¥5,655	¥24,805

Notes:

- (1) The carrying amount recognized in the consolidated balance sheet was net of accumulated depreciation and accumulated impairment losses, if any.
- (2) The increase during the fiscal year ended March 31, 2016, primarily represents the acquisition of certain properties of ¥565 million. The decreases during the fiscal years ended March 31, 2017 and 2016, primarily represent depreciation of ¥168 million (\$1,500 thousand) and ¥145 million, respectively.
- (3) The fair value of properties was primarily measured by the Group in accordance with its Real-Estate Appraisal Standard.

8. SHORT-TERM BANK LOANS AND LONG-TERM DEBT

Short-term bank loans consisted of notes to banks and bank overdrafts. The weighted-average rates of annual interest applicable to short-term bank loans at March 31, 2017 and 2016, were 0.56% and 0.78%, respectively.

Long-term debt at March 31, 2017 and 2016, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Loans from banks and other financial institutions due serially to 2023 with weighted-average interest rates of 0.58% in 2017 and 0.68% in 2016	¥ 90,291	¥ 96,141	\$ 806,169
0.68% unsecured bonds due December 1, 2016	–	10,000	–
0.335% unsecured bonds due May 27, 2019	10,000	10,000	89,286
0.150% unsecured bonds due March 7, 2022	10,000	–	89,286
Obligations under finance leases	815	930	7,277
Total	111,106	117,071	992,018
Less: Portion due within one year	(16,127)	(24,648)	(143,991)
Total long-term debt	¥ 94,979	¥ 92,423	\$ 848,027

Annual maturities of long-term debt at March 31, 2017, were as follows:

Year Ending March 31	Millions of Yen	Thousands of U.S. Dollars
2018	¥ 16,127	\$143,991
2019	26,730	238,661
2020	26,314	234,946
2021	15,291	136,527
2022	14,148	126,321
2023 and thereafter	12,496	111,572
Total	¥111,106	\$992,018

The Company and a consolidated subsidiary entered into line-of-credit agreements with nine banks. The details of the agreements were as follows:

	Millions of Yen	Thousands of U.S. Dollars
Line-of-credit amount	¥24,700	\$220,536
Balance used at March 31, 2017	–	–

9. PLEDGED ASSETS

The carrying amounts of assets pledged as collateral for notes and accounts payable of ¥12 million (\$108 thousand) and other current liabilities of ¥8 million (\$71 thousand) at March 31, 2017, were as follows:

	Millions of Yen	Thousands of U.S. Dollars
Time deposits	¥ 17	\$ 151
Land	5,061	45,188
Buildings and structures	2,113	18,866
Machinery and equipment	1,101	9,830
Investment securities	48	429
Total	¥8,340	\$74,464

10. RETIREMENT AND PENSION PLANS

The Company and its consolidated subsidiaries have defined retirement benefit plans and unfunded pension plans. Certain consolidated subsidiaries have defined contribution pension plans, multi-employer contributory funded pension plans, and smaller enterprise retirement allowance mutual aid plans.

The Group has employee retirement benefit trusts.

Furthermore, additional severance payments, which are not included in liability for employees' retirement benefit, are paid in certain cases.

Certain small consolidated subsidiaries apply the simplified method to state the liability based on the amount which would be paid if employees retired at the consolidated balance sheet date.

Some subsidiaries participate in multi-employer contributory funded plans, and the plans are accounted for as if the plans were defined contribution plans in the case that the plan assets attributable to the contributions by the subsidiaries cannot be reliably determined.

During the year ended March 31, 2017, the Company transferred a portion of its assets from the employee retirement benefit trust. Accordingly, the Company recorded unrecognized actuarial gain of ¥2,524 million (\$22,536 thousand) for the year ended March 31, 2017.

1. The changes in defined benefit obligation for the years ended March 31, 2017 and 2016, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Balance at beginning of year	¥55,123	¥51,262	\$492,170
Current service cost	2,139	1,815	19,098
Interest cost	168	575	1,500
Actuarial (gains) losses	(60)	5,484	(536)
Benefits paid	(4,123)	(4,102)	(36,813)
Past service cost	-	95	-
Others	(1)	(6)	(8)
Balance at end of year	¥ 53,246	¥55,123	\$ 475,411

2. The changes in plan assets for the years ended March 31, 2017 and 2016, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Balance at beginning of year	¥ 74,650	¥84,671	\$ 666,518
Expected return on plan assets	1,427	1,467	12,741
Actuarial gains (losses)	6,447	(9,171)	57,563
Contributions from the employer	802	798	7,160
Benefits paid	(3,746)	(3,112)	(33,446)
Others	(12,223)	(3)	(109,134)
Balance at end of year	¥ 67,357	¥74,650	\$ 601,402

3. The changes in liability for employees' retirement benefits for which the simplified method was applied to record the liability for the years ended March 31, 2017 and 2016, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Balance at beginning of year	¥2,286	¥2,204	\$20,411
Pension costs	564	740	5,035
Benefits paid	(271)	(359)	(2,420)
Contributions to pension funds	(339)	(295)	(3,026)
Others	(0)	(5)	(0)
Balance at end of year	¥2,240	¥2,285	\$20,000

4. A reconciliation between the liability recorded in the consolidated balance sheet and the balances of defined benefit obligation and plan assets as of March 31, 2017 and 2016, is as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Funded defined benefit obligation	¥ 53,203	¥ 55,043	\$ 475,027
Plan assets	(70,501)	(77,536)	(629,473)
Total	(17,298)	(22,493)	(154,446)
Unfunded defined benefit obligation	5,427	5,253	48,455
Net asset arising from defined benefit obligation	¥(11,871)	¥(17,240)	\$(105,991)

5. The components of net periodic benefit costs for the years ended March 31, 2017 and 2016, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Service cost	¥ 2,139	¥ 1,815	\$ 19,098
Interest cost	168	575	1,500
Expected return on plan assets	(1,427)	(1,467)	(12,741)
Amortization of prior service benefit	3,181	(1,432)	28,402
Recognized actuarial gains	(80)	(54)	(714)
Retirement benefits for which simplified method was applied	564	740	5,036
Additional severance payments	97	92	866
Gain on transfer of assets from retirement benefit trust	(2,524)	–	(22,536)
Net periodic benefit costs	¥ 2,118	¥ 269	\$ 18,911

6. Amounts recognized in other comprehensive income (before income tax effect) in respect of defined retirement benefit plans for the years ended March 31, 2017 and 2016:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Prior service cost	¥ (80)	¥ (149)	\$ (714)
Actuarial gains (losses)	7,164	(16,087)	63,964
Total	¥7,084	¥(16,236)	\$63,250

7. Amounts recognized in accumulated other comprehensive income (before income tax effect) in respect of defined retirement benefit plans as of March 31, 2017 and 2016:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Unrecognized prior service cost	¥ 225	¥ 305	\$ 2,009
Unrecognized actuarial gains (losses)	2,815	(4,349)	25,134
Total	¥3,040	¥(4,044)	\$27,143

8. Plan assets

(1) Components of plan assets

Plan assets consisted of the following:

	2017	2016
Debt investments	14%	15%
Equity investments	64	65
Assets in an insurer's general account	21	19
Others	1	1
Total	100%	100%

(2) Method of determining the expected rate of return on plan assets

The expected rate of return on plan assets is determined considering the long-term rates of return which are expected currently and in the future from the various components of the plan assets.

9. Assumptions used for the years ended March 31, 2017 and 2016, are set forth as follows:

	2017	2016
Discount rate	0.3%	0.3%
Expected rate of return on plan assets	2.0	2.0

Some consolidated subsidiaries participate in a multi-employer plan for which the Company cannot reasonably calculate the amount of plan assets corresponding to the contributions made by the subsidiaries. Therefore, it is accounted for using the same methods as used to account for a defined contribution plan.

The contributions to such multi-employer plan, which are accounted for using the same method as a defined contribution plan, were ¥265 million (\$2,366 thousand) and ¥317 million for the years ended March 31, 2017 and 2016, respectively.

(1) The funded status of the multi-employer plan as of March 31, 2017 and 2016, was as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Plan assets	¥251,436	¥263,436	\$2,244,964
Sum of actuarial liabilities of pension plan and minimum actuarial reserve	253,982	268,703	2,267,696
Net balance	¥ (2,546)	¥ (5,267)	\$ (22,732)

(2) The contribution ratio of the Group in the multi-employer plan for the years ended March 31, 2017 and 2016, was as follows:

	2017	2016
The contribution ratio of the Group in the multi-employer plan	2.29%	2.28%

11. ASSET RETIREMENT OBLIGATIONS

The changes in asset retirement obligations for the years ended March 31, 2017 and 2016, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Balance at beginning of year	¥432	¥426	\$3,857
Additional provisions associated with the change in the estimated costs of PCB waste disposal	-	6	-
Reconciliation associated with passage of time	4	0	35
Balance at end of year	¥428	¥432	\$3,822

12. EQUITY

Japanese companies are subject to the Companies Act of Japan (the “Companies Act”). The significant provisions in the Companies Act that affect financial and accounting matters are summarized below:

(a) Dividends

Under the Companies Act, companies can pay dividends at any time during the fiscal year in addition to the year-end dividend upon resolution at the Shareholders' Meeting. Additionally, for companies that meet certain criteria, such as (1) having a Board of Directors, (2) having independent auditors, (3) having an Audit & Supervisory Board, and (4) the term of service of the directors being prescribed as one year rather than the normal two-year term by its articles of incorporation, the Board of Directors may declare dividends (except for dividends-in-kind) at any time during the fiscal year if the company has prescribed so in its articles of incorporation. However, the Company cannot do so because it does not meet all the above criteria.

The Companies Act permits companies to distribute dividends-in-kind (non-cash assets) to shareholders subject to certain limitations and additional requirements.

Semiannual interim dividends may also be paid once a year upon resolution by the Board of Directors if the articles of incorporation of the company so stipulate. The Companies Act provides certain limitations on the amounts available for dividends or the purchase of treasury stock. The limitation is defined as the amount available for distribution to the shareholders, but the amount of net assets after dividends must be maintained at no less than ¥3 million.

(b) Increases/Decreases and Transfer of Common Stock, Reserve, and Surplus

The Companies Act requires that an amount equal to 10% of dividends must be appropriated as a legal reserve (a component of retained earnings) or as additional paid-in capital (a component of capital surplus) depending on the equity account charged upon the payment of such dividends until the total of the aggregate amount of the legal reserve and additional paid-in capital equals 25% of common stock.

Under the Companies Act, the total amount of additional paid-in capital and legal reserve may be reversed without limitation. The Companies Act also provides that common stock, legal reserve, additional paid-in capital, other capital surplus, and retained earnings can be transferred among the accounts within equity under certain conditions upon resolution of the shareholders.

(c) Treasury Stock and Treasury Stock Acquisition Rights

The Companies Act also provides for companies to purchase treasury stock and dispose of such treasury stock by resolution of the Board of Directors. The amount of treasury stock purchased cannot exceed the amount available for distribution to the shareholders which is determined by a specific formula. Under the Companies Act, stock acquisition rights are presented as a separate component of equity. The Companies Act also provides that companies can purchase both treasury stock acquisition rights and treasury stock. Such treasury stock acquisition rights are presented as a separate component of equity or deducted directly from stock acquisition rights.

13. INCOME TAXES

The Company and its domestic subsidiaries are subject to Japanese national and local income taxes which, in the aggregate, resulted in normal effective statutory tax rates of approximately 31% and 33% for the years ended March 31, 2017, and 2016, respectively.

The tax effects of significant temporary differences and loss carryforwards, which resulted in deferred tax assets and liabilities at March 31, 2017 and 2016, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Deferred tax assets:			
Accrued bonuses	¥ 2,142	¥ 2,079	\$ 19,125
Liability for employees' retirement benefits	2,803	2,763	25,027
Allowance for doubtful accounts	56	53	500
Write-down of securities and other assets	2,726	2,663	24,339
Net loss carryforwards	3,327	2,996	29,705
Elimination of unrealized gain on inventories	884	883	7,893
Provision for environmental measures	1,153	1,737	10,295
Enterprise tax	420	285	3,750
Other	4,106	4,542	36,661
Less valuation allowance	(9,045)	(7,727)	(80,759)
Total deferred tax assets	8,572	10,274	76,536
Deferred tax liabilities:			
Deferred gain on property, plant, and equipment	1,757	1,830	15,688
Land revaluation surplus	1,230	1,230	10,982
Unrealized gain on securities	8,868	5,774	79,178
Asset for employees' retirement benefits	5,026	6,215	44,875
Unrealized gain on lands resulting from consolidation of a subsidiary	1,076	1,057	9,607
Transfer of investment securities from retirement benefit trust	3,342	–	29,839
Other	1,893	1,751	16,902
Total deferred tax liabilities	23,192	17,857	207,071
Net deferred tax liabilities	¥14,620	¥ 7,583	\$130,535

A reconciliation between the normal effective statutory tax rates and the actual effective tax rates reflected in the accompanying consolidated statement of income for the year ended March 31, 2017, with the corresponding figures for 2016 is as follows:

	2017	2016
Normal effective statutory tax rates	31.0 %	33.0 %
Expenses not deductible for income tax purposes	1.2	1.9
Revenues not recognized for income tax purposes	(4.7)	(9.9)
Per capita tax	0.4	0.7
Net change in valuation allowance	5.8	9.0
Effects of elimination of dividends for consolidation purposes	4.2	6.9
Effect of accounting by the equity method	(0.9)	(0.9)
Lower income tax rates applicable to income in certain foreign countries	(0.2)	(0.9)
Tax credit	(3.6)	(4.8)
Effect of change in statutory tax rate	–	(0.8)
Investments in subsidiaries	0.3	4.2
Other—net	(0.3)	0.8
Actual effective tax rates	33.2 %	39.2 %

14. RESEARCH AND DEVELOPMENT COSTS

Research and development costs charged to income were ¥6,206 million (\$55,411 thousand) and ¥5,766 million for the years ended March 31, 2017 and 2016, respectively.

15. SELLING, GENERAL, AND ADMINISTRATIVE EXPENSES

Selling, general, and administrative expenses for the years ended March 31, 2017 and 2016, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Freight expenses	¥13,175	¥12,948	\$117,634
Salaries and welfare expenses	22,002	21,944	196,446
Provision for bonuses to employees	2,475	2,340	22,098
Provision for bonuses to directors and Audit & Supervisory Board members	230	159	2,054
Net periodic retirement benefit costs	2,059	154	18,384
Depreciation	1,226	1,227	10,946
Other	11,754	11,229	104,947
Total	¥52,921	¥50,001	\$472,509

16. LEASES

(As lessor)

Expected revenues from noncancelable operating leases at March 31, 2017 and 2016, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Due within one year	¥ 508	¥ 507	\$ 4,536
Due after one year	2,631	3,116	23,491
Total	¥3,139	¥3,623	\$28,027

17. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES

(1) Group Policy for Financial Instruments

The Group uses financial instruments, mainly short-term and long-term debt including bank loans and bonds, based on its capital financing plan. Cash surpluses, if any, are invested in low-risk financial assets. Derivatives are used, not for speculative purposes, but only for the purpose of reducing exposure to financial risks as described in (2) below.

(2) Nature and Extent of Risks Arising from Financial Instruments

Receivables—trade, such as trade notes and accounts, and electronically recorded monetary claims, are exposed to customer credit risk. Although receivables in foreign currencies are exposed to the market risk of fluctuation in foreign currency exchange rates, those risks are netted against the balance of payables denominated in the same currency, of which positions are almost equal. In addition, foreign currency receivables of certain consolidated subsidiaries are hedged by using forward foreign currency contracts. Investment securities, mainly equity instruments of customers and suppliers of the Group and for alliance purposes, are exposed to the risk of market price fluctuations.

Payment terms of payables—trade, such as trade notes and accounts, and electronically recorded obligations, are less than one year. Although payables in foreign currencies are exposed to the risk of fluctuation in foreign currency exchange rates, those risks are netted against the balance of receivables denominated in the same foreign currency, of which positions are almost equal, as noted above. In addition, foreign currency trade payables in certain consolidated subsidiaries are exposed to risk resulting from fluctuations in foreign currency exchange rates. The risk is hedged by using forward foreign currency contracts.

Short-term bank loans and commercial paper are mainly used for general operating purposes, and long-term bank loans and bonds are mainly used for investment and strategy. Although a portion of such bank loans and commercial paper, excluding bonds, is exposed to risk of changes in variable interest rates, that risk is mitigated by using interest rate swaps. Bonds are not exposed to risk of changes in interest rates as interest rates are fixed.

Derivatives mainly include forward foreign currency contracts, which are used to manage future cash flows, currency swaps and interest rate swaps, which are used to manage risks from changes in interest rates of bank loans. Please see Note 18 for more details about derivatives.

(3) Risk Management for Financial Instruments

Credit Risk Management

Credit risk is the risk of economic loss arising from a counterparty's failure to repay or service debt according to the contractual terms. The Group manages its credit risk from receivables on the basis of internal guidelines, which include monitoring of payment terms and balances of major customers by each business administration department to identify the default risk of customers at an early stage. To reduce the counterparty risk, the Group enters into derivative transactions only with highly rated financial institutions. Please see Note 18 for detail about derivatives.

The maximum credit risk exposure of financial assets is limited to their carrying amounts as of March 31, 2017.

Market Risk Management (Foreign Currency Exchange Rate Risk and Interest Rate Risk)

Foreign currency trade receivables and payables are exposed to market risk resulting from fluctuations in foreign currency exchange rates. Such risk is netted against the balance of receivables and payables, of which positions are almost equal. In addition, certain consolidated subsidiaries hedge such risk principally by using forward foreign currency contracts.

Interest rate swaps and currency swaps are used to manage exposure to risks of changes in interest rates of loan payables.

Investment securities are managed by monitoring market values and the financial position of issuers on a regular basis.

Derivative transactions of the Company are undertaken by the finance and accounting department and the procurement center and reported to directors or the Board of Directors based on internal policies that prescribe the authority and maximum amount for each transaction. Derivative transactions of consolidated subsidiaries are undertaken by the finance and accounting department based on internal policies.

Liquidity Risk Management

The Group manages its liquidity risk by establishing a cash management plan according to reports from each department.

(4) Fair Values of Financial Instruments

Fair values of financial instruments are based on quoted prices in active markets. If quoted prices are not available, other rational valuation techniques are used instead. Please see Note 18 for details of the fair value of derivatives.

(a) Fair value of financial instruments

	Millions of Yen			Thousands of U.S. Dollars		
	Carrying Amount	Fair Value	Unrealized Gain (Loss)	Carrying Amount	Fair Value	Unrealized Gain (Loss)
March 31, 2017

Payables—trade	68,153	68,153	–
Income taxes payable	2,752	2,752	–
Long-term debt	92,423	92,845	(422)
Total	¥206,521	¥206,978	¥ (457)

Cash and Cash Equivalents, Time Deposits, Receivables—Trade, Short-Term Bank Loans, Current Portion of Long-Term Debt with Variable Interest Rates, Payables—Trade, and Income Taxes Payable

The carrying values of cash and cash equivalents, time deposits, receivables—trade, short-term bank loans, current portion of long-term debt with variable interest rates, payables—trade, and income taxes payable, approximate fair value because of their short maturities. The fair values of receivables—trade, payables—trade, and short-term bank loans include the fair values of foreign currency forward contracts and interest rate swaps.

Investment Securities

The fair values of investment securities are measured at the quoted market price of the stock exchange for equity instruments and at the quoted price obtained from the financial institution for certain debt instruments. Fair value information for investment securities by classification is included in Note 4.

Long-Term Debt with Fixed Interest Rates

The fair values of long-term debt with fixed interest rates are determined by discounting the cash flows related to the debt at the risk-free rate plus credit spread or at the Group's assumed corporate borrowing rate. The fair values of bonds are measured at quoted market prices.

Derivatives

Fair value information for derivatives is included in Note 18.

(b) Carrying amount of financial instruments whose fair value cannot be reliably determined

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Securities that do not have a quoted market price in an active market:

Please see Note 8 for annual maturities of long-term debt and the current portion of long-term debt.

18. DERIVATIVES

The Group enters into foreign currency forward contracts, interest rate swaps, and currency swaps. The Group does not hold or issue derivatives for trading or speculative purposes. Derivative transactions entered into by the Group have been made in accordance with internal policies, which regulate hedging policy, authorization, credit limit, and reporting to management. Each derivative transaction is periodically reported to management, which evaluates and analyzes the derivatives. To reduce the counterparty risk, the Group enters into the derivative transactions only with highly rated financial institutions. The contract amounts of derivatives which are shown in the following table do not measure the Group's exposure to market risk.

Derivative Transactions to Which Hedge Accounting Is Not Applied at March 31, 2017 and 2016

Millions of Yen				
At March 31, 2017	Contract Amount	Contract Amount Due after One Year	Fair Value	Unrealized Gain (Loss)

Interest rate swaps:				
Fixed rate payment, floating rate receipt				

Note: Fair values of derivatives qualified for hedge accounting, which are not remeasured at market value, are included in the fair values of hedged items in Note 17.

19. COMMITMENTS AND CONTINGENT LIABILITIES

At March 31, 2017, the Group was contingently liable for ¥8,662 million (\$77,339 thousand) for guarantees of loans and payables of unconsolidated subsidiaries, associated and other companies and employees, including borrowings of ¥3,600 million (\$32,143 thousand) by Yugen Kaisha Takakura Founding Corporation (“Takakura”).

The Company was obligated to make an additional investment in Takakura via an anonymous association contract with an upper limit of ¥524 million (\$4,679 thousand) in the event that buildings owned by Takakura are destroyed or impaired by natural disaster at March 31, 2017.

20. OTHER COMPREHENSIVE INCOME (LOSS)

The components of other comprehensive income (loss) for the years ended March 31, 2017 and 2016, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2017	2016	2017
Unrealized gain on available-for-sale securities:			
Gains (losses) arising during the year	¥10,422	¥(17,029)	\$ 93,054
Reclassification adjustments to profit or loss	7	(318)	63
Amount before income tax effect	10,429	(17,347)	93,117

Total other comprehensive income (loss)	¥11,392	¥(24,316)	\$101,714

21. SUBSEQUENT EVENT

a. Appropriations of retained earnings

The following appropriation of retained earnings at March 31, 2017, was approved at the Company's Shareholders' Meeting held on June 28, 2017:

	Millions of Yen	Thousands of U.S. Dollars
Year-end cash dividends, ¥6.0 (\$0.05) per share	¥2,558	\$22,839

b. Share consolidation and change in the number of shares constituting one trading unit

The Company resolved on the share consolidation and partial amendment of the articles of incorporation to change the number of shares constituting one trading unit at the Company's Shareholders' Meeting held on June 28, 2017.

1. Purpose of share consolidation and change in the number of shares constituting one trading unit

Japanese stock exchanges are aiming to standardize the number of shares per trading unit at 100 shares. In recognition of this aim, the Company will change its share trading unit size, the number of shares constituting one trading unit, from 1,000 shares to 100 shares. The purpose of this share consolidation is to maintain the price of one trading unit of its stock at the same level after the number of shares constituting one trading unit is reduced.

2. Details and timing of the share consolidation

The Company shall consolidate the shares on October 1, 2017 by a factor of 10 to 1 based on the shareholders registered on September 30, 2017.

The decrease in shares after the share consolidation will be as follows:

Number of issued shares before the share consolidation as of March 31, 2017	434,487,693 shares
Decrease in shares by the share consolidation	391,038,924 shares
Number of issued shares after the share consolidation	43,448,769 shares

(Note) These are theoretical figures which are calculated by multiplying the number of issued shares before the share consolidation by the consolidation ratio.

3. Processing for a fraction of less than one share

If a fraction of less than one share is created due to share consolidation, such fractional shares will be sold together pursuant to the provisions of the Companies Act, and the proceeds will be distributed to shareholders who held the fractional shares in proportion to the number of fractional shares they held.

4. Change in the number of shares constituting one trading unit

The Company will change the number of shares per trading unit from 1,000 shares to 100 shares on October 1, 2017.

5. Change in the number of authorized shares

The number of authorized shares shall be changed from 1,160,000,000 shares to 116,000,000 after the share consolidation.

6. Schedule

Resolution at the Board of Directors' meeting	May 10, 2017
Resolution at the Company's Shareholders' Meeting	June 28, 2017
Effective date of the share consolidation and the change in the number of shares per trading unit	October 1, 2017

7. Effect on per share information

If the share consolidation was carried out at the beginning of the year ended March 31, 2016, per share information for the years ended March 31, 2017 and 2016, is as follows:

	Yen		U.S. Dollars
	2017	2016	2017
Net assets per share	¥6,094.74	¥5,452.58	\$54.42
Basic net income per share	385.92	156.22	3.45

22. SEGMENT INFORMATION

Under ASBJ Statement No. 17, "Accounting Standard for Segment Information Disclosures," and ASBJ Guidance No. 20, "Guidance on Accounting Standard for Segment Information Disclosures," an entity is required to report financial and descriptive information about its reportable segments. Reportable segments are operating segments or aggregations of operating segments that meet specified criteria. Operating segments are components of an entity about which separate financial information is available and such information is evaluated regularly by the chief operating decision-maker in deciding how to allocate resources and in assessing performance. Generally, segment information is required to be reported on the same basis as is used internally for evaluating operating segment performance and deciding how to allocate resources to operating segments.

1. Description of reportable segments

The Group's reportable segments are those for which separate financial information is available and regular evaluation by the Company's management is being performed in order to decide how resources are allocated among the Group.

The Group has business divisions based on the nature of its products and services. Each division draws up strategies and operates its own business.

The Group consists of five industries: "Specialty Steel," "High Performance Materials and Magnetic Materials," "Parts for Automobile and Industrial Equipment," "Engineering," and "Trading and Service." "Specialty Steel" industry consists of manufacturing of specialty steel for automotive and industrial machinery parts.

The "High Performance Materials and Magnetic Materials" industry consists of manufacturing of stainless steel, high alloy and magnetic materials, titanium products and powder metals for automotive and industrial machinery, and electrical and electronic parts.

The "Parts for Automobile and Industrial Equipment" industry consists of manufacturing of die-forged parts, forging products, and other products for automotive and industrial machinery parts.

The "Engineering" industry consists of manufacturing and maintenance of steelmaking and environmental equipment, industrial furnaces, and associated equipment.

The "Trading and Service" industry consists of real estate-related services and welfare and other services.

2. Methods of measurement for the amounts of sales, profit, assets, and other items for each reportable segment

The accounting policies of each reportable segment are consistent with those disclosed in Note 2, "SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES."

Reportable segment profit represents operating income.

3. Information about sales, profit, assets, and other items is as follows:

	Millions of Yen						Reconciliations	Consolidated
	Reportable Segment					Total		
	Specialty Steel	High Performance Materials and Magnetic Materials	Parts for Automobile and Industrial Equipment	Engineering	Trading and Service

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of Daido Steel Co., Ltd.:

We have audited the accompanying consolidated balance sheet of Daido Steel Co., Ltd. and its consolidated subsidiaries as of March 31, 2017, and the related consolidated statements of income, comprehensive income, changes in equity, and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information, all expressed in Japanese yen.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in Japan, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Daido Steel Co., Ltd. and its consolidated subsidiaries as of March 31, 2017, and the consolidated results of their operations and their cash flows for the year then ended in accordance with accounting principles generally accepted in Japan.

Convenience Translation

Our audit also comprehended the translation of Japanese yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made in accordance with the basis stated in Note 1 to the consolidated financial statements. Such U.S. dollar amounts are presented solely for the convenience of readers outside Japan.
